**RE: Occidental Chemical Corp. v. 21st Century Fox America, Inc. et al.
Docket No. 2:18-cv-11273-MCA-JAD**

Dear Kathy:

The Joint Protocol for Production of Documents and Electronically-Stored Information (the “Joint Protocol”) sets out a series of steps that the parties are to take to identify and produce responsive ESI. Paragraph 3(j) provides that “[t]he parties will meet and confer regarding a proportional list of custodians whose ESI documents . . . will be collected for review and potential production.” Paragraph 3(k) provides that “[t]he parties will meet and confer regarding appropriate methodologies to identify the ESI documents to be reviewed for production.” Consistent with the requirements of the Joint Protocol and Special Master Scrivo’s request at the November 20 meeting, this letter responds to OxyChem’s ESI methodology described in your letter of September 26, 2019, and outlines the SPG’s ESI methodology for individual Defendants to adopt as appropriate.

In particular, this letter requests clarification regarding OxyChem’s ESI methodology and proposes modifications to the specific search terms. The search terms, custodians, and search methodology will have to be discussed more fully with OxyChem and the SPG reserves the right to request modifications to its methodology. Similarly, while this letter proposes an ESI methodology as a starting point for the members of the SPG, Liaison counsel do not represent individual Defendants in party-specific discovery responses and each party has a somewhat unique situation, making a single ESI methodology, including common search terms, inappropriate for all Defendants. Therefore, each defendant will use the ESI methodology set forth in this letter as a starting point, to which each defendant reserves the right to make modifications to suit their unique individual circumstances. As a result, discussions between OxyChem and individual Defendants regarding specific custodians and search term issues may be necessary.

I. Response to OxyChem’s ESI Methodology

In your letter of September 26, 2019 to Liaison Counsel, you describe the steps OxyChem has taken to identify custodians and collect ESI pursuant to the requirement of Paragraph 3(k) of the Joint Protocol. Several aspects of that letter require clarification.

PRETI FLAHERTY

Kathy Patrick, Esq.

Gibbs & Bruns LLP December 19, 2019

Page 2

The September 26, 2019 letter identifies three categories of ESI in OxyChem's possession, custody, or control. The first category is entitled "Tierra Transition ESI." The September 26, 2019 letter states, "In connection with the bankruptcy of its indemnitors Maxus and Tierra, OxyChem took possession of certain electronically-stored information related to its indemnitors' various environmental remediation projects." Please confirm: 1) that the "Tierra Transition ESI" includes all ESI obtained from Maxus and Tierra as a result of the Transition Services Agreement, and 2) that all ESI within this category was reviewed by counsel for responsiveness and privilege without the use of search terms.

The second category of ESI described in the September 26, 2019 letter is "Electronic Media Found in Hard-Copy Files." According to the September 26, 2019 letter, this category consists of "hundreds of electronic media" that were co-located with hard-copy materials that OxyChem obtained in connection with the Maxus/Tierra Bankruptcy. As to this second category, please confirm that all ESI was or will be reviewed for responsiveness and privilege by counsel without the use of search terms.

The September 26, 2019 letter also states that "[c]ertain employees of OxyChem and its affiliates have possession, custody, or control of documents related to the Site or otherwise responsive to Defendants' requests for production" This third category of ESI is referred to as "OxyChem ESI."

The September 26, 2019 letter generally describes the types or subjects of OxyChem ESI but does not provide any detail as to how relevant employees and affiliates were identified or how the searches were conducted to identify responsive documents. In addition, it appears that some or all of the "custodians" listed in Exhibit A to the September 26, 2019 letter may not have had actual possession of ESI but instead were interviewed regarding "locations . . . where potentially responsive ESI may be stored." Without additional detail on the relationship of the individuals listed in Exhibit A to the subject matter of this suit, it is impossible to determine whether Exhibit A, in fact, constitutes a "proportional list of custodians."

Furthermore, while we acknowledge that Exhibit B to the September 26, 2019 letter provides sixteen pages of search terms, these terms were only applied to "locations where ESI related to the Site was not intentionally filed, but nevertheless may contain responsive ESI (e.g., "Sent" email folders)." This appears to be at odds with the process contemplated by the Joint Protocol in which custodians' ESI is searched for potentially responsive documents using an established set of search terms. In addition, the search terms identified in Exhibit B are insufficient to reasonably capture potentially responsive ESI. We propose that OxyChem's ESI search terms be expanded in accordance with Exhibit 1 to this letter.

We also note that the search terms listed in Exhibit B to the September 26, 2019 letter will likely yield a vast number of documents completely unrelated to this litigation. For example, the terms Maxus, Newark, Passaic, "Debtor in Possession", "Environmental Standard*", "Federal Reserve Bank of New York", and "Maxus Energy Corporation" would include a significant volume of information unrelated to the Lister Ave. site and Passaic River remedy including, Maxus

PRETI FLAHERTY

Page 3

sites all around the country, unrelated discussions about or in towns in New Jersey, interactions with banks or discussions of bankruptcies unrelated to the Diamond Alkali corporate successorship, and discussions of environmental standards generally or at unrelated sites. The September 26, 2019 letter states, “ESI documents containing one or more search terms and any related inclusive threads were subject to a linear review for responsiveness and privilege.” Please confirm that a “linear review” means that all hits using these broad search terms have been or will be reviewed further by counsel for responsiveness to Defendants’ document requests and privilege, and that only documents responsive to Defendants’ document requests and not subject to a claim of privilege will be produced. If OxyChem intends to produce all non-privileged documents that are captured by the broad search terms in Exhibit B without regard to Defendants’ document requests, Defendants propose that OxyChem’s existing search terms be narrowed in accordance with Exhibit 1 to this letter.

II. SPG ESI Search Limitations and Terms

As you know, Liaison counsel do not represent individual Defendants with respect to party-specific discovery. The ESI search methodology set forth below and the terms attached are intended to provide a starting point for the ESI of individual Defendants. Individual Defendants are not bound by the suggested search terms, and each facility and company is somewhat unique requiring specific unique search terms to capture relevant and responsive ESI. Each Defendant will provide requested discovery consistent with any objections it may have and its obligations under the Federal Rules.

The scope of ESI discovery sought by OxyChem is limited to three topics: 1) historical operations at Defendants’ Properties, 2) releases of hazardous substances at Defendants’ properties, and 3) remedial investigations and actions at Defendants’ properties. As a threshold matter, this discovery is limited by the terms of the Joint Protocol including, but not limited to Paragraph 4(c), p. 11 which provides:

No party is required to search, produce, or include in its privilege logs:

- (1) the custodial files of counsel of record or outside attorneys advising in this litigation or with respect to the Diamond Alkali Superfund Site (or their associated attorneys and support staff, including paralegal and secretarial personnel);
- (2) the custodial files of in-house counsel advising in this litigation or with respect to the Diamond Alkali Superfund Site (or their associated attorneys and support staff, including paralegal and secretarial personnel);
- (3) joint defense communications pursuant to a joint defense agreement, provided that the date of the joint defense agreement and the parties to it are disclosed; and
- (4) privileged communications between counsel and clients created or received for purposes of the Spill Act Litigation during the time period of the Spill Act Litigation.

PRETI FLAHERTY

Kathy Patrick, Esq.

Gibbs & Bruns LLP December 19, 2019

Page 4

In addition, in February 2019, the parties agreed that, at least for initial discovery, “Defendant’s Property” is limited to facilities or properties at issue in the Complaint.

Along with these existing limitations, we propose the following additional qualifications to the three general categories of ESI to be produced.¹

(1) Historical operations at Defendants’ Properties

- Limit to years during which the Defendant owned or operated the property
- Limit to manufacturing operations that used or generated any of the eight COCs identified in the ROD

(2) Releases of hazardous substances at Defendants’ Properties

- Limit to the eight COCs identified in the ROD
- Exclude releases to contained or indoor spaces

(3) Remedial investigations and actions at Defendants’ Properties

- Limit to remedial investigations and remedial actions performed by the Defendant under CERCLA, ISRA, ECRA, or the Spill Act relating to releases of any of the eight COCs identified in the ROD
- Limit as to years during which the Defendant owned or operated the property
- Exclude releases to contained or indoor spaces
- Exclude environmental compliance audits and similar investigations undertaken by or at the direction of counsel
- Exclude the custodial files of in-house counsel and outside attorneys advising in any such audits and investigations (and their associated attorneys and support staff, including paralegal and secretarial personnel)

SPG members may apply these limitations and terms listed in Exhibit 2 to this letter to formulating Defendant-specific searches for responsive ESI. As we have previously explained, the SPG search terms will need to be modified on an individual basis for each party (modifications, additions or deletions of search terms, as well as implementation of connectors) to account for the unique circumstances of each party and facility. The list of proposed terms in Exhibit 2 should serve as a starting point which each party may so modify to suit their unique and individual circumstances.

¹ We note that searches are limited to materials that are electronically stored. Joint Protocol 2.(b)(3) states, “A party intending to provide Hard Copy Documents for review or inspection by the requesting party is not required to copy, scan, or otherwise reproduce the Hard Copy Documents, but rather must provide the documents for review and inspection as they are presently maintained or stored.”

PRETI FLAHERTY

Kathy Patrick, Esq.

Gibbs & Bruns LLP December 19, 2019

Page 5

Discussions between OxyChem and individual Defendants as to issues concerning their search may be required.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Talbert", with a long horizontal flourish extending to the right.

Jeffrey D. Talbert
